Sealy History

1881

1881

Sealy is the name of a small town outside of Houston in Texas, and is the home of Daniel Haynes, a cotton gin builder, who began making special cotton-filled mattresses in 1881, which were soon became known as the "mattresses from Sealy".

1949

1949

Sealy starts research and development in conjunction with leading orthopedic surgeons beginning with Dr. Addison, a renowned authority on back pain.

1988

1988

The Sealy PostureTech coil with "Sense and Respond" feature is designed revolutionizing spring unit design and performance.

2004

2004

Sealy is the official mattress supplier of the U.S.Olympics Team in the 2004 Summer Olympics.

Today

Today

Today Sealy is the biggest mattress manufacturer with operations in over 35 countries and regions. In a world of mass production, Sealy beds are still handcrafted one at a time, combing the latest technologies with quality materials, delivering high-quality sleep and healthy life.

Global-leading International Brand

As the biggest bedding manufacturer Sealy has been World's No.1 selling mattress for over 40 years and operates in over 40 countries and regions after over 130 years development. Developed in conjunction with leading orthopedic surgeons from USA, Sealy's better sleep has been providing superior harmony of support, comfort and durability for over 100 years. You can be sure that every bed meets the most exacting standards laid down by Sealy.

Sealy holds the No.1 position of brand awareness among mattress brands in American consumers at the rate of 90% (2007 American Authority Home Furnishing Magazine <HFN> brand survey), No.9 position of brand awareness among all household brands (2009 American Authority Home Furnishing Magazine <HFN> household brand ranking) and twice as one of "America's Most Admired Companies" chosen by <Fortune Magazine>.

Not just for family users, Sealy also surpassed standards of five-star or more luxurious hotels. For many decades, Sealy has been the No.1 premium bedding supplier to the hospitality industry around the world. Sealy is the chosen mattress for the world's most luxurious hotel - Burj Al-Arab in Dubai and global five-star hotel groups, such as Four Seasons, Ritz-Carlton, InterContinental Hotels Group, St. Regis, Fairmount, the Venetian...

Research and Development

ORTHOPEDIC
ADVISORY BOARD

Dr. Robert G. Addison

Dr. William E. Gartett Jr.

Dr. Gary G. Poehling

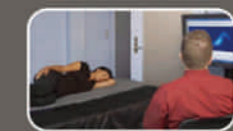

Dr. Thomas L. Smith

As early as 1949 Sealy products were developed in conjunction with leading orthopedic surgeons beginning with Dr. Addison, a renowned authority on back pain. In 2006 Sealy formed the Orthopedic Advisory Board to continue to build on Sealy's rich orthopedic heritage. It focuses on developments and innovations that help contribute to consumers' orthopedic health and provide more restful and recuperative sleep.

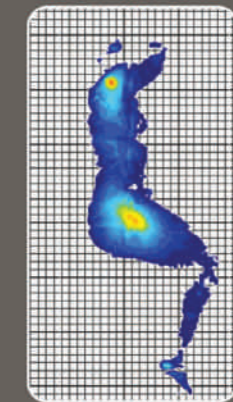

The Orthopedic Advisory Board collaborates with Sealy's leaders in Research & Development to help Sealy:

- Develop advancements that offer orthopedically correct support and contribute to overall orthopedic health;
- Direct and oversee academic sleep studies and research, understand the nature of sleep and sleep problems, and design products that meet consumers' evolving needs.

Sealy always insists using own original patented core technologies and continuously achieves self-innovation and technological development. Consequently, Sealy maintains the world's largest and most advanced research and development center and testing laboratory in the furniture industry. Sealy spends more times and resources on sleep research and product development than any other bedding manufacturer.

Roofator

Pressure Mapping

Digital Motion Capture

Impact Test

"Triple offset" design

Our revolutionary design provides superior body conformance, while preventing roll together. The improved coil-to-coil hinging action enhances the innersprings ability to intelligently adjust to the hips & shoulders.

Sensory arm

Detects the shape, weight and movement of your body while you sleep, then adjusts itself to provide correct spinal alignment.

Twice-tempered steel

High carbon spring steel coils are twice heat tempered to provide memory so they will repeatedly return to their original height over a long period of time, to build resiliency and durability into the coil for maximum life.

Patented Unique Posture Tech Coil

The Sealy PostureTech Coil design supports and conforms to the unique shape of the human back and body of all body shapes and sizes as it moves through the night with exacting precision – a bed for everyone. According to the Load Deflection Analysis, it is easy to see that the PostureTech Coil is able to provide a soft initial feel which then firms responding to increased pressure, which makes Sealy unique and incomparable.

Believe in World-Class Sleeping

Whatever you do in bed,
Sealy supports it.®

Unique Triple System Design

Comfort System

Sealy's comfort layers are provided in combinations to deliver increasingly higher levels of luxury, resist body impressions, retain its comfort life longer and give your customers unmatched comfort.

Support System

Sealy's exclusive PostureTech coil, developed in conjunction with orthopedic surgeons, features the Sense and Respond Support System that responds to body weight with increasing, correct support.

UniCased Construction

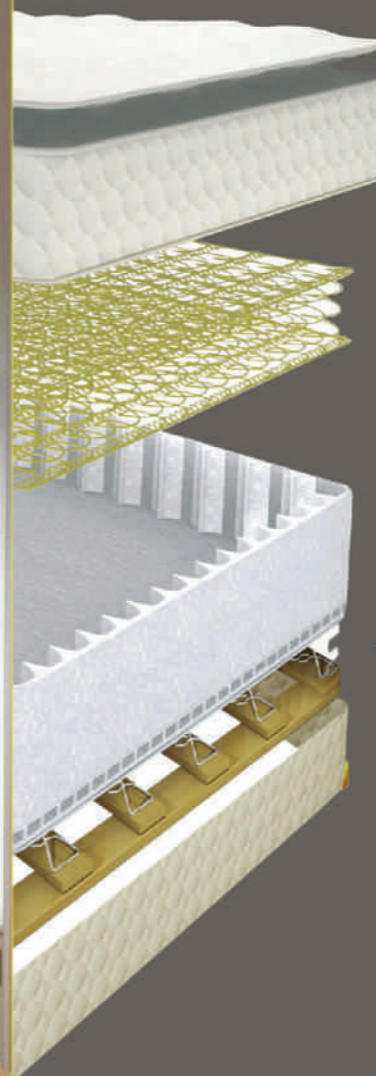

UniCased Edge-KeyGuard surrounds and locks into the entire perimeter of the mattress innerspring system and is thermo-bonded to the UniCased Baseplank providing:

- Enhanced support and comfort performance of the PostureTech coil.
- Greater sleeping surface and uniform comfort edge to edge.
- Minimal partner disturbance and enhanced stability.

Foundation

Our foundation features a new patented one-piece steel design. The unique grid/leg assembly is very efficient, firmer, durable and noiseless. Features include:

- A complete one-piece steel foundation with no separate components.
- Heavy duty border rod is welded to grid for maximum edge firmness and no side away. Reinforced grid adds surface coverage and enhances stability.
- Passed all durability tests including Cornell, Rollator and Impact.

Sealy Crown Series

Posture Tech®

PostureTech Coil design supports and conforms to the unique shape of the human back and body of all body shapes and sizes as it moves through the night with exacting precision – a bed for everyone.

UniCased® Edge

UniCased® construction is unique technology to Sealy, which is designed uniform edge to edge comfort and support, minimize partner disturbance.

Ticking

Fire Retardant low hazard, Sanitized Jacquard Ticking, Gentle Continuous Quilting, Anti-Mould, Anti-Bacteria, Anti-Dust Mite.

Comfort Layer

Comfort layers are key in determining how a bed feels. A Sealy mattress is designed to have very little feel change over its life.

Foundation

Our foundation features a new patented one-piece steel design. The unique grid/leg assembly is very efficient, firmer, durable and noiseless.

Sealy Excellence Series

Posture Tech®

PostureTech Coil design supports and conforms to the unique shape of the human back and body of all body shapes and sizes as it moves through the night with exacting precision – a bed for everyone.

Miracle Edge Support

Miracle Edge Support is an engineered, polyethylene insert placed around the entire perimeter of the mattress. The inclusion of Miracle Edge Support effectively extends the sleep surface by an average of 10% as well as providing a firm seating edge.

Ticking
